ABE Materials to Offer Bulk Agricultural Lime at New Sale Price

Easton, PA – [ABE Materials](#), producer of a full line of [crushed stone products](#) and [asphalt materials](#), is proud to now offer crushed agricultural limestone at the low cost of \$8.75 per ton. ABE Materials quarries limestone and dolomite for use as an aggregate product for building materials, but also quarries stone selected for its high purity in Calcium Carbonate and Magnesium Carbonate for agricultural use. This limestone is crushed and sized to be easily applied with spinner-type spreaders. ABE Materials' diversified crushing and materials handling operations provide us with the capacity to offer this agricultural lime at a lower cost than other suppliers.

[Agricultural lime](#) is used to increase the pH level, thereby lowering the acidity of soil. Acidic soil will reduce plant growth by inhibiting the intake of major plant nutrients, such as Nitrogen, Phosphorus and Potassium. Agricultural lime improves the uptake of these major plant nutrients, as well as providing a source of calcium and magnesium. A controlled soil pH level can improve both fertilizer and herbicide efficiency and result in significantly increased crop yields.

The high rainfall levels experienced in the region this season will likely result in higher than usual soil acidity due to leaching. Additionally, land used for crop and livestock can become more acidic over time due to crop removal. Soil with low levels of naturally occurring lime can be very slow to balance the pH level, if at all.

Located in Easton, PA, ABE Materials is positioned to serve growers in both Pennsylvania and New Jersey and offer full-service delivery. This special sale price of \$8.75 per ton will only be available as supplies last. Call 610-250-7700 with any questions or to schedule pick up or delivery.

About ABE Materials – Easton:

ABE Materials - Easton is a proud member of [The H&K Group](#) Family of Companies, and has been producing a full line of stone products and asphalt materials since 1984. In addition to agricultural limestone, ABE offers a blue/gray limestone and dolomite that yields an exceptional aggregate product. This aggregate has various PENNDOT, NJDOT and NYDOT approvals. ABE Materials also utilizes material from their crushed stone operation to offer all PENNDOT and NJDOT asphalt mixes, as well as various custom mixes, all SUPERPAVE mixes, and high performance and standard 485 cold patch. The state-of-the-art facility includes an on-site laboratory to ensure quality control, and three 200-on storage silos that provide rapid product delivery for voluminous jobs.

The knowledgeable staff at ABE Materials - Easton is ready and pleased to assist you. If you have any questions regarding products, directions, deliveries, or any other general inquiries, please contact the scale house at 610-250-7700 or the asphalt plant at 610-250-7691.
