

PROJECT PROFILE

Project

Lafayette College Gummesson Grounds
New Soccer Stadium

Location

Sullivan Trail, Easton, PA

H&K Company

Lehigh Valley Division, Easton, PA

Client

Irwin & Leighton / Lafayette College

Project Info

Reconstruction of existing soccer practice field into new stadium at Gummesson Grounds. Work included stormwater conveyance system including above ground basin with PVC liner installation, Outlet structure, HDPE pipe, precast structures, and field drainage. Excavation and installation of access road around the existing field to provide working space for installation of new concrete bleachers and walkways on east and west sides, and installation of the main grandstands, entrance and walkways including the new press box building. New electrical and fiber optic trenching and installation for scoreboard and field lights, paver installation, concrete curb and new paving sections.

Project Highlights

The project required an aggressive schedule, with work having to be completed with an early spring start and a six-month window to have the soccer stadium available for Lafayette's first game in the beginning of September. Multiple subcontractors and limited access, along with multiple delays due to weather made for a very challenging project.
