

ASPHALT PAVING REPAIRS & MAINTENANCE

Team

PAVEMENT EVALUATION SERVICES

EVALUATE

H&K Group, Inc.'s (**H&K's Asphalt Paving Repair & Maintenance Team**) provides critical support to engineers and facility managers who demand accurate, superior information and performance from their asphalt pavement evaluations. Whether the asphalt paving surface is still in the planning stage, newly installed or stressed and deteriorating, our Team is here to help.

We employ skilled paving specialists and laboratory technicians who have the knowledge and technology to peer into both existing and newly-completed pavement and subgrades to evaluate the performance and quality of the asphalt surface. Using a minimally-invasive coring process, we can quickly and efficiently assist engineers and evaluate finished paving surfaces to determine materials specification or quality. Further, if a forensic approach is required to determine pavement failure or distress, our Team can efficiently core large paving surfaces with ease and provide the information necessary to make informed evaluation decisions.

DESIGN

Having literally invented the asphalt paving process (our Windsor Service affiliate has been "Paving Since 1918"), our Team knows everything there is to know about asphalt.

Whether you're designing or building a parking complex, evaluating an existing asphalt surface or subgrade, or confirming the quality and performance of a newly installed surface, our Team of asphalt professionals and laboratory technicians have the skill and experience that you demand.

Additionally, if your next paving project requires a complex mix design or unique subbase specification, our Team is skilled in the mastery of one-off, complex mix designs. Further, with ready access to our own **asphalt plants** and **crushed stone facilities**, we cover the spectrum in aggregate type and quality across the eastern PA, NJ and DE region.

CONSTRUCT

As the Mid-Atlantic Region's heavy civil contractor of choice for over 50 years, **H&K** possesses the workforce, technology and high-quality paving materials to tackle projects of any size or scope. Furthermore, our experienced professionals can assist with all phases of asphalt pavement construction from project estimation, administration and coordination, to surface construction and paving to field testing, materials verification and even finished striping and long-term maintenance.

We welcome your questions, project opportunities and most challenging pavement designs. Remember: from evaluation, to design, to construction, **H&K's Asphalt Paving & Maintenance Team** is your contractor of choice.
