SERVING CONTRACTORS & HOMEOWNERS

HOME DELIVERY AVAILABLE

Serving The Construction Industry Since 1957...

Rahns Construction Material Company was originally founded in 1957 by Raymond B. Long in Rahns, PA. Raymond Long's son-in-law, Paul Yerck, Jr., would ultimately team up with friends John B. Haines IV and John R. "Jack" Kibblehouse in 1974 to acquire the business and form Rahns Concrete (RAHNS) as we know it today. Now a proud member of The H&K Group Family of Companies, RAHNS is a major supplier of ready-mix and precast concrete products to eastern Pennsylvania (PA) and the surrounding three-state (NY, NJ and DE) region.

RAHNS currently operates eight permanent ready-mix concrete plants across eastern PA. Additionally, we own and operate portable ready-mix plants which can be set up anywhere throughout the Mid-Atlantic Region to provide on-site ready-mix products for large construction projects. RAHNS also manufactures precast concrete products at its Rahns, PA location and produces all standard precast products. RAHNS can also fabricate large, custom precast structures for bridges, box culverts and other complex civil structures.

Providing you with outstanding customer service is our main priority. Our knowledgeable and friendly staff is ready to assist you with any questions you may have, so choose RAHNS for both ready-mix and precast concrete products for all of your residential and commercial construction projects. We look forward to providing you with the best service, products, and equipment from our conveniently-located facilities.

Ready-Mix Concrete Products

With our state-of-the-art production facilities and highly trained staff, we produce the finest ready-mix concrete products available. Our iconic fleet of RAHNS mixer trucks is also available day or night to deliver our concrete wherever is needed. Mixer-mounted conveyor trucks are also available for those "hard-to-reach" jobs. They can discharge product at 85 cubic yards per hour, up to 40 feet away and at a height of 25 feet.

RAHNS Ready-Mix Products Include:

- 1500 PSI through 5000 PSI
- Pool Mixes
- Fine & Coarse Grout
- Shotcrete
- Lightweight Concrete
- Curb Mixes
- Flowable Fill
- Pumpable Mixes
- Colored Concrete
- Air & Non Air Mixers
- ¾" & ½" Stone Mixes
- #467 Stone Mixes Available upon Request
