The H&K Group Launches New Paving Repairs and Maintenance Team

The H&K Group, based in Skippack, PA, recently announced the formation of their new Paving Repairs and Maintenance Team, a specialized team of highly trained professionals that can assist customers with all of their asphalt paving repair and maintenance needs.

The H&K Group is one of the region's premiere site contracting companies, who specialize in providing complete asphalt paving repair and maintenance services, ranging in size from a small parking lot or pothole repair to a total reconstruction of a multi-acre parking facility, large pavement surface patch, or a complete structural overlay. They have both the flexibility and resources to manage any range in work scope.

Further distinguishing The H&K Group as an industry leader, they own and operate 19 hot mix asphalt plants and 26 crushed stone facilities strategically located throughout their service area. This benefit enables them to efficiently and cost-effectively supply their affiliate contracting companies with the asphalt and aggregate products they need to better serve the valued customer. Because they own and operate these materials facilities, they can modify their operating times to suit their customer's needs. Thus, if off-peak, night paving or maintenance is required, The H&K Group would be more than accommodating.

Coupled with their convenient materials facilities, The H&K Group's resource base of state-of-the-art equipment and technology is unparalleled in the industry. From compact milling and cutting equipment to the latest in high-production, full-lane width (up to 13 ft.) track mounted cold planers, they can quickly and cost-effectively repair and maintain existing asphalt parking, traffic or access roads.

As a further benefit to their customers and clients, The H&K Group also offers in-house Engineering Design Services to assist with complex drainage control problems, pavement evaluations and re-design. Their skilled professionals can walk clients through these design and evaluation services should they be required.

Anyone seeking asphalt repair services, or any other of the vast array of services that The H&K Group provides, should visit their website at www.hkgroup.com.
